

MathFLIX CHALLENGE

Order of Operations Puzzle 1

Use 1, 2, and 3 to make equations that equal 0 – 10. You must use each number only once. The numbers may be in any order. Use any operation (addition (+), subtraction (-), multiplication (*), and division (/)) in any order and any number of times. As you can see by the completed examples, you may use parentheses and exponents. The first equation has been done for you.

$$0 = (3 - 2) - 1$$

$$1 =$$

$$2 =$$

$$3 =$$

$$4 =$$

$$5 =$$

$$6 =$$

$$7 =$$

$$8 =$$

$$9 = 3^2 / 1$$

$$10 =$$
