

MathFLIX CHALLENGE

Identification of Fractions

When matching written fractions to pictures, it is always important to know which number goes with which part of the picture. For instance:

$$\frac{2}{3}$$

corresponds to

because the 2, or numerator, matches with the number of segments shaded in; the denominator, 3, matches with the total number of segments in the picture. Try matching the following fractions to their pictures.

$$\frac{1}{3}$$

$$\frac{3}{4}$$

$$\frac{4}{11}$$

$$\frac{5}{8}$$

$$\frac{5}{6}$$

$$\frac{2}{5}$$
